

Roundtable on
**Learner Centered Instruction: Classroom Practices, including use of
Technology in Higher Education at the Undergraduate Level**

The focus of this Roundtable is classroom practices that contribute to 'learning' as against merely accomplishing a task called 'teaching.' All teachers know the difference—and know that it is a constant challenge. How do we use the limited time we have with the students to increase the effectiveness of instruction and the depth of student learning?

The Roundtable would be attended by teachers from across disciplines taught in our college -- Humanities, Social Sciences, Home Science, Commerce, Computer Science, Applied Psychology, and Education. Hence the exchange would focus on broad ideas and strategies, and not on specific content of subjects.

Dr. Anita Charles has kindly consented to make a presentation and participate in the discussion. Dr. Charles is the Director of Teacher Education at Bates College, Lewiston, Maine, USA. She is currently in New Delhi, India on a Fulbright Scholars Program with a project on Transformative Education in India and is being hosted by Lady Sri Ram College, U of Delhi.

The details of time and place are given below:

Friday 8 April 2016, 1 pm in the Committee Room, SPM College, U of Delhi

Dr. Nita N Kumar
Principal (Officiating)
