Research Interests/ Specialization						
<ul style="list-style-type: none"> <li>Interested in exploring the interrelationship between Text and Performance and addressing how a text is translated into performance and vice versa. What constituted a performance? What is a Performance Space? and how a text is constructed?</li> <li>Investigating the underlying nuances in understanding who a person is. How the person act and how the concept of personhood is defined or looked at in different space and time.</li> </ul>						

- I am interested in researching and addressing the historical and cultural knowledge-gap created by colonialism and modernism. My research attempts to address-In what way do the colonial records and accounts shape the contemporary selfhood? How does a community, anchored in a predominantly oral tradition, made distant to its indigenous beliefs systems by processes of colonization and modernity, begin to address the cultural dissonances of the past plaguing its present? How can we initiate a process of decolonization of knowledge production in the absence of adequate understanding of a pre-colonial past? If the decolonized wants to write their own histories and address the gaps in their own cultural past, what methodologies can be useful to construct a cultural history from rather scattered sources?
